-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(~~3~~) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

1. Applicant's election with traverse of Group I in the reply filed on January 19, 2006 is acknowledged. The traversal is on the grounds that the examiner did not provide one-way distinctness. This is not found persuasive because Group I comprises a greater concentration of catalyst at the inlet of a flow path as compared to an outlet of this flow path. This limitation is not part of the Group II method.

The requirement is still deemed proper and is therefore made FINAL.

2. In view of applicant's amendment, the claims require a further restriction requirement.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a first fuel cell, classified in class 429, subclass 40.
- II. Claims 10 and 27-30, drawn to a second fuel cell, classified in class 429, subclass 34.

4. The inventions are distinct, each from the other because of the following reasons: Group I comprises a fuel cell which comprises a greater concentration of catalyst at the inlet of a flow path as compared to an outlet of this flow path. This limitation is not part of the Group II fuel cell and is this distinct therefrom.

5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their different subject matter and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1745

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-
